

Part-Time Job Finder Platform

Connecting Job Seekers and Employers Efficiently

Group number 3

22

Introduction: Bridging the Part-Time Employment Gap

Web & mobile platform to connect job seekers and employers effectively.

Addresses job instability for workers and reputation management for employers.

Fills the critical need for a streamlined part-time job market solution.

Problem Statement: Addressing Key Market Challenges

1 Job instability

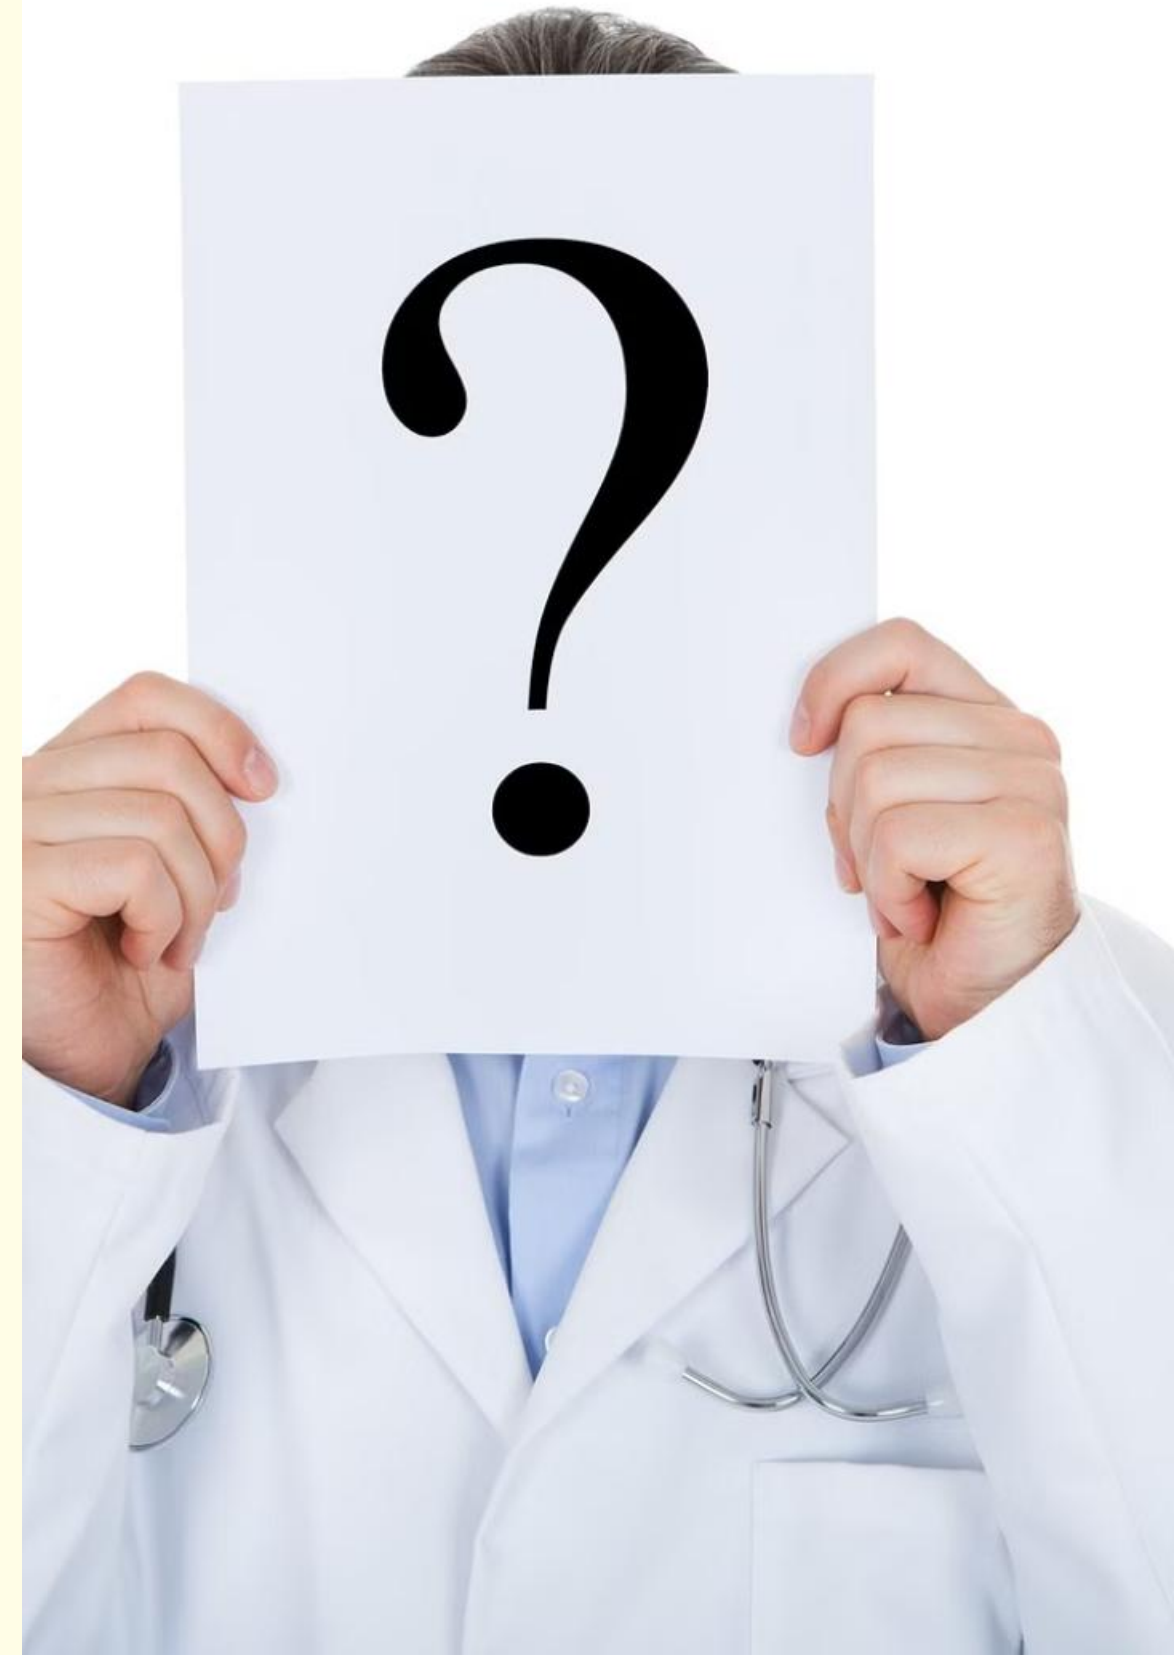

Inconsistent work and income for part-time workers.

2 Reputation management

Ensuring reliability and quality of part-time work.

3 Inefficient matching

Difficulty connecting suitable workers with employers quickly.

Solution: A Comprehensive Platform for Part-Time Employment

Key features

Job posting, applicant tracking, rating system, and secure payment.

Web based system

Accessible on multiple devices for convenience.

Technology stack

React (frontend), Node.js (backend), MongoDB (database).

Target Audience: Serving Diverse Market Needs

Students

Seeking flexible employment opportunities to fund education.

Freelancers

Aiming to supplement income with part-time engagements.

Employers

Businesses requiring temporary staffing for peak seasons or specific projects.

Core Features: Enhancing User Experience and Efficiency

Advanced search

Location-based filtering, skill matching, and availability preferences.

1

User profiles

Comprehensive details for job seekers and employer reputation.

2

Real-time notifications

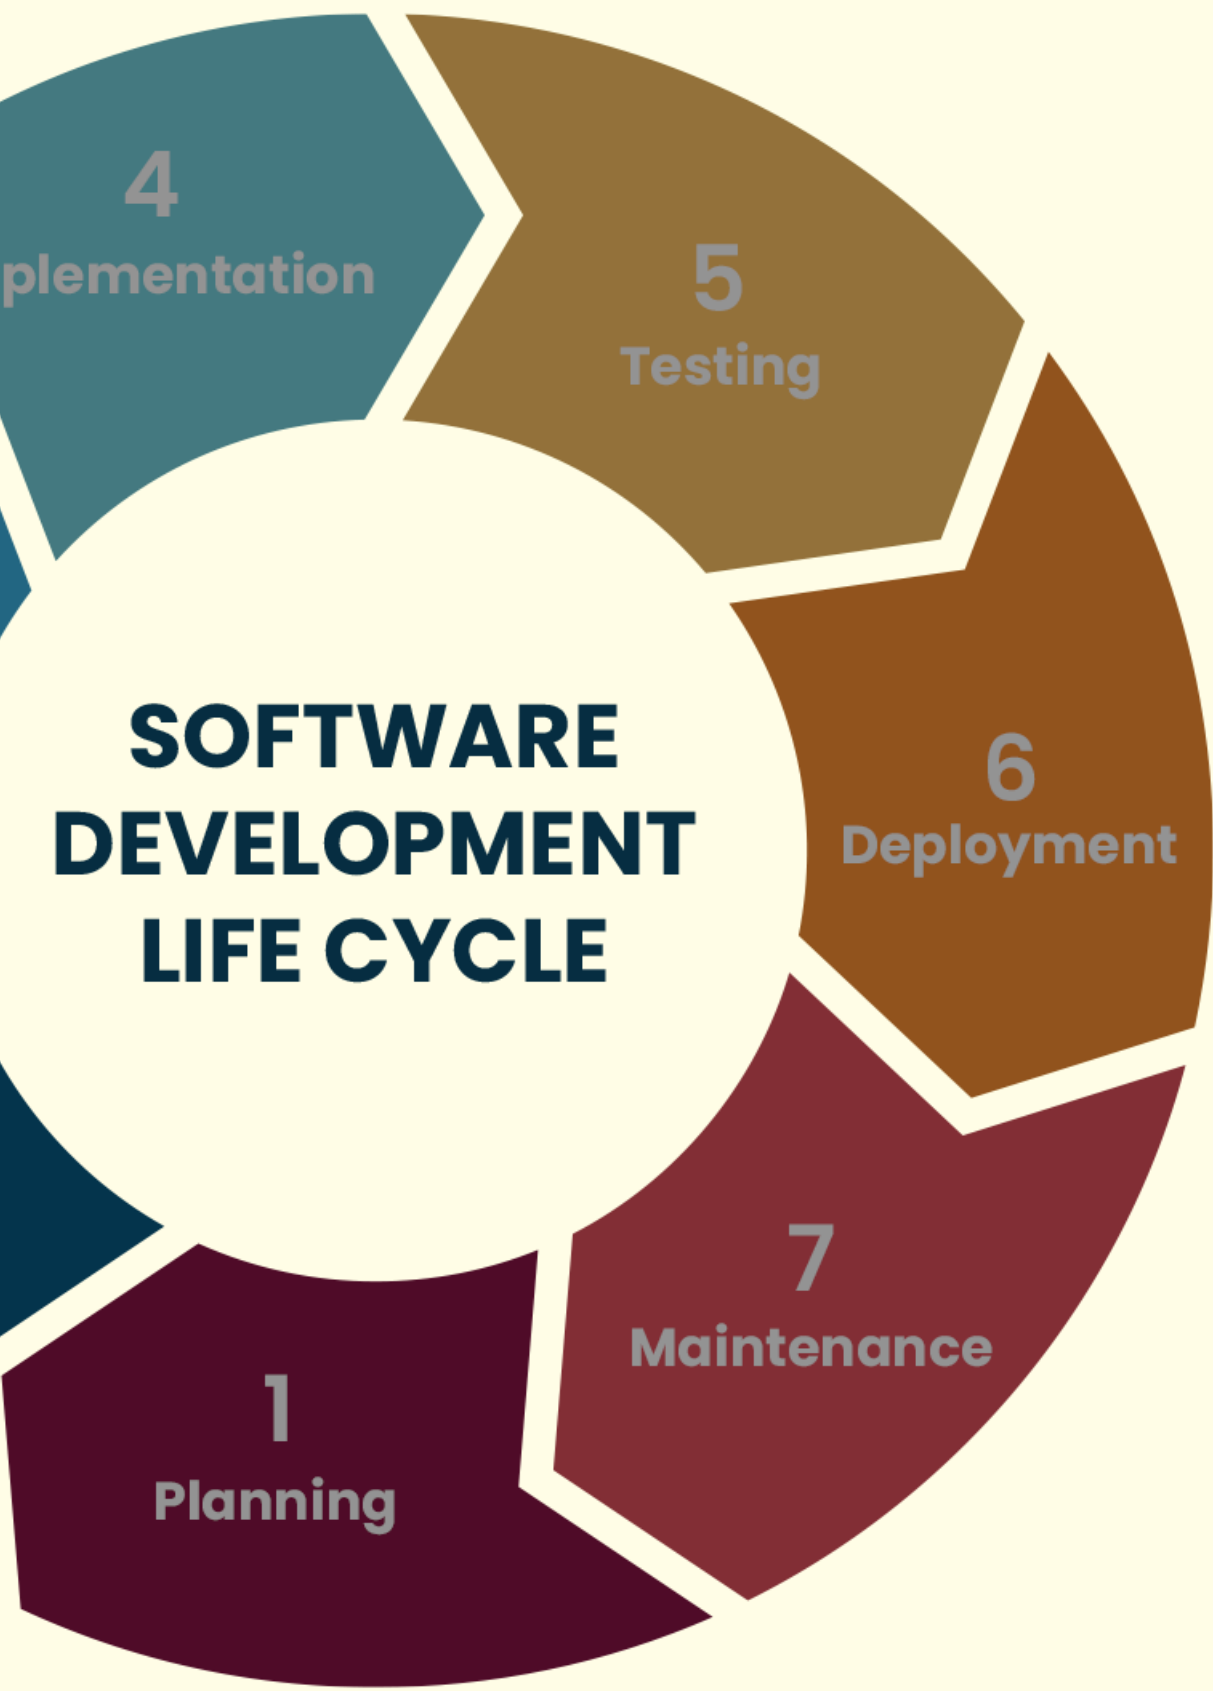

Instant alerts for job postings and application updates.

3

Rating and reviews

Feedback mechanism for quality assurance and trust-building.

4

Development Process: Agile Approach

Planning & Design

- Define project requirements and scope.
- Create UI/UX wireframes and design the database structure.

Development

- Build the **frontend** (React.js) and **backend** (Node.js, Express.js).
- Implement **job search, filtering, and application**

Testing & Refinement

- Conduct **testing** to ensure functionality, security, and performance.
- Gather **user feedback** and make improvements.

Deployment & Launch

- Deploy on **AWS/Firebase** and set up security measures.
- Perform final testing and launch the platform.

Conclusion: Empowering the Future of Part-Time Work

Platform addresses critical needs in the growing part-time employment market.

Team commitment: dedicated members with expertise in tech and business.

Investment opportunity: potential for high growth and positive social impact.

Call to action: Partner with us to revolutionize the part-time job landscape.
